- Pre-Engineered Buildings

Anderson-Moore Construction **AMC** is a **BUTLER BUILDER**:

Today there are more than 1,400 Butler Builders worldwide, representing the largest network of construction professionals in the world. From initial design through completed construction, no one builds pre-engineered buildings like a Butler Builder.

**We Are:**

- Independent construction professionals who undergo comprehensive training from Butler Manufacturing Company
- A single-source solution that assures faster construction and great cost effectiveness
- Local business people with a solid, outstanding reputation in our community

Butler is certified by the American Institute of Steel Construction (AISC) as a category MB fabricator. This assures you that our design and fabrication processes are in complete compliance with strict AISC standards.

**Advantages**

Butler Buildings can provide you with many cost and time saving alternatives to conventional building systems. These systems are the highest quality pre-engineered buildings available on the market today. In addition to having the #1 most specified standing seam metal roof in the industry, Butler offers a wide variety of wall, roof, structural, and end-use specific building systems. Use Butler for entire building solutions or combine Butler products with conventional building methods to receive the advantages plus the versatility you are looking for.

From material use to transportation costs, construction has an impact on the environment. Butler strives to meet all construction needs with attention to sustainability, providing a more efficient way to complete your construction project. The green attributes of Butler can help you earn points toward LEED certification.
