Through our on-going OSHA certified programs, we educate our field and management team regarding construction safety issues. With knowledge and awareness of work tasks that cause the most injuries and OSHA citations, our team can prepare and guard against those task hazards.

All of our Project Managers and Superintendents are card-carrying, OSHA certified having completed a nine-hour certification program. AMC subscribes to a weekly OSHA safety newsletter that is the informational foundation for the weekly safety meetings at each jobsite location. This is just one way we ensure our team certifications.

In addition, a monthly training meeting is held at the AMC office. Safety demonstration videos are viewed and added to the safety training library. All Project Managers and Superintendents attend the meeting.

All necessary OSHA information is displayed in the AMC jobsite trailers, along with safety kits, fire extinguishers and all other required safety products.

AMC also strictly enforces safety guidelines and regulations, mandating subcontractor compliance. We've implemented a written reprimand policy consisting of a four-part document utilized for formal notification of a violation. All necessary parties are contacted and the appropriate action is taken. **AT AMC, JOBSITE SAFETY IS A PRIORITY!**

In addition –

AMC is a proud member of the National Safety Council – Mission:

To educate and influence society to adopt safety, health and environmental policies, practices and procedures that prevent and mitigate human suffering and economic losses arising from preventable causes.
